

## Dynamic Pixel Multimedia Solutions

Dynamic Pixel: Revamp the Way you E-Learn

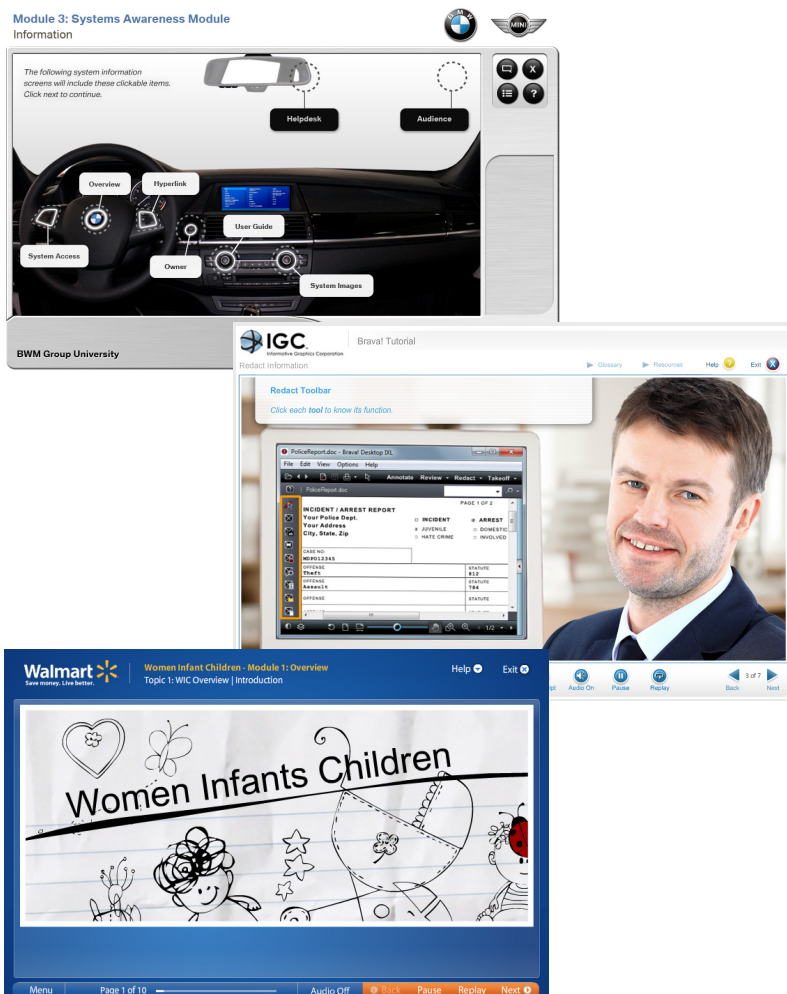

## Learning Strategy Consulting

The right balance between the understanding of the subject background and the technological solution to it, is the key to a successful problem-solving strategy.

We, at **Dynamic Pixel**, have subject matter experts striving to match their skills with your training and development issues to create viable, feasible e-learning solutions ensuring proper fit and advantageous elucidation for you. This is the substratum to effective consulting, and we have it straight.

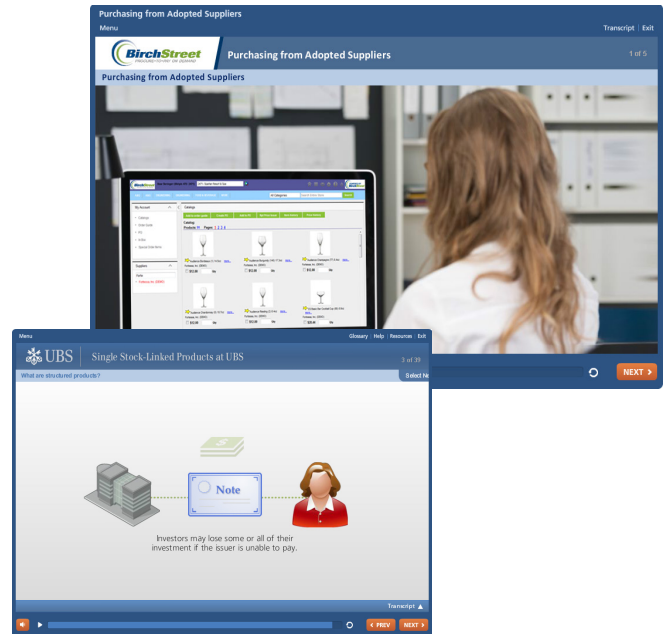

**Custom E-Learning Solutions**

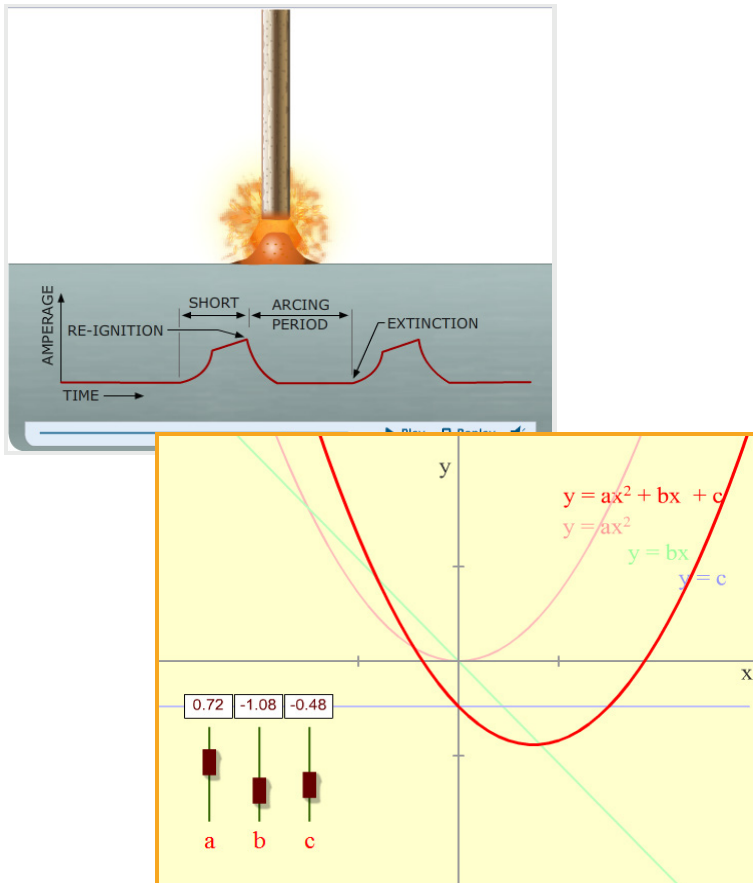

The core of any learning program is its creativity in communication – it should not just be visually appealing and informative, but also easy to understand and recall. Our e-learning solutions are prepared by experienced professionals, who make a robust strategy, create the communication programs using storyboards and proper content and present it to the target audience in a way that they appreciate and absorb the knowledge well. The custom made knowledge programs have a high degree of personalization adding to the relevance.

## Rapid Authoring

Otherwise time consuming and tedious, the job of converting already existing learning content of an organization can be smoothly executed using our Rapid Authoring services. We add to the plain existing PDFs and PPTs of your organizational training material with attractive and interactive tools making it more comprehensive. This saves time as well as money, and the effect on the trainees is extensive.

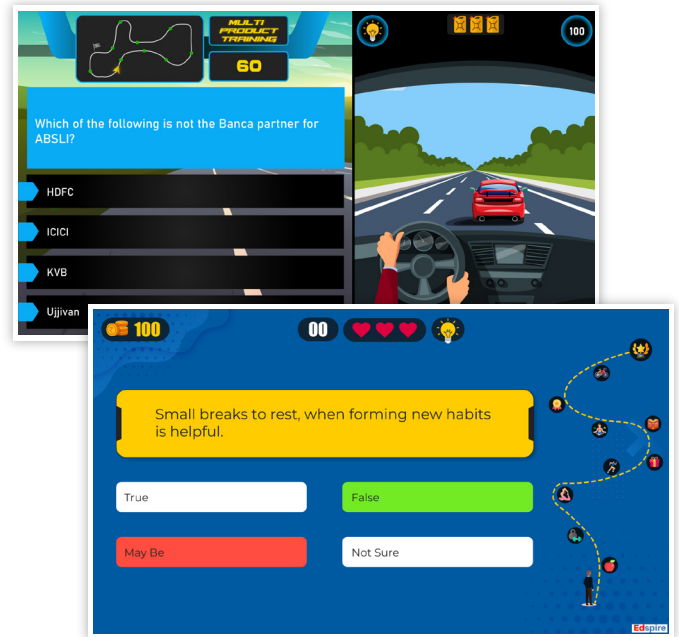

## Learning Simulations

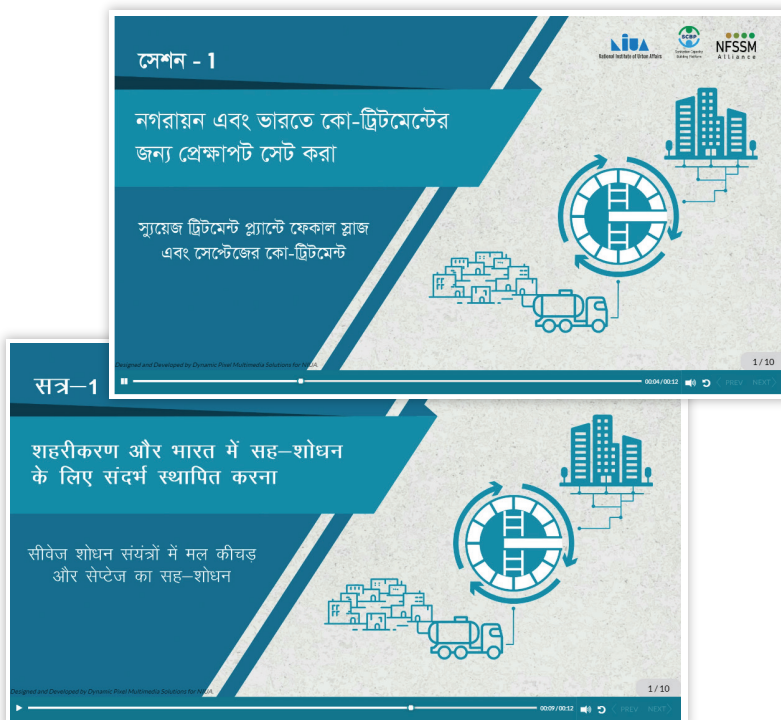

Simulations are a great way to learn the real stuff in virtual situations – the realistic expressions of machines and gadgets go a long way in ensuring the user is sure of the techniques as well as adept at troubleshooting in the real day-to-day scenario. The animations in 3D make the experience absolute.

## Game-based Learning

Play is but a way to learn – games allow a better degree of knowledge absorption as well as connect to the learner in a very personal way. Many options in a game make sure the decision-making capacity is challenged and improved. The experience of game-based learning is much more involving than any other learning format. We excel at creating games for your e-learning requirements that allow your employees' thinking horizons to expand.

## Translation Services

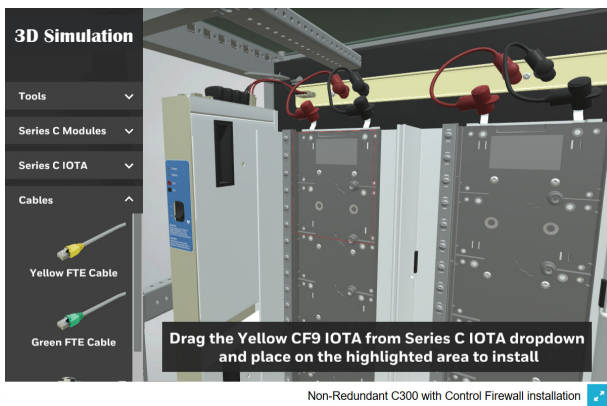

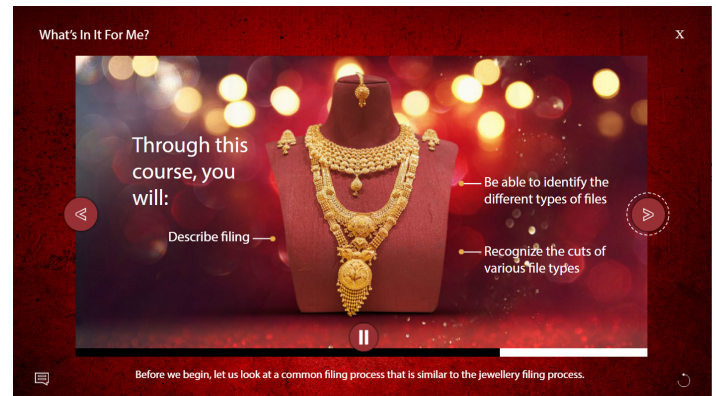

Each business needs to localize its learning products for the trainees of particular regions else the services would be of no use. Dynamic Pixel lets you translate your presentations, software, videos and the rest into the languages and dialects of choice for maximum impact. We do the job in the minimum time and with optimum efficiency, thanks to our experience in translating millions of words in all major languages.

## SCORM-Compliant Content

We develop content compatible with SCORM standards, ensuring seamless integration with any LMS. These are interactive and engaging content packages designed as per Level 1, 2, 3 and 4 standards to meet desired learning objectives ranging from basic, static content with minimal interactivity to complex scenarios, branching, simulations and immersive experiences and real-time feedback.

### Gamified Interactive Content with SCORM

**Tracking:** Engaging, game-based learning that increases motivation and knowledge retention and designed with SCORM standards for performance tracking.

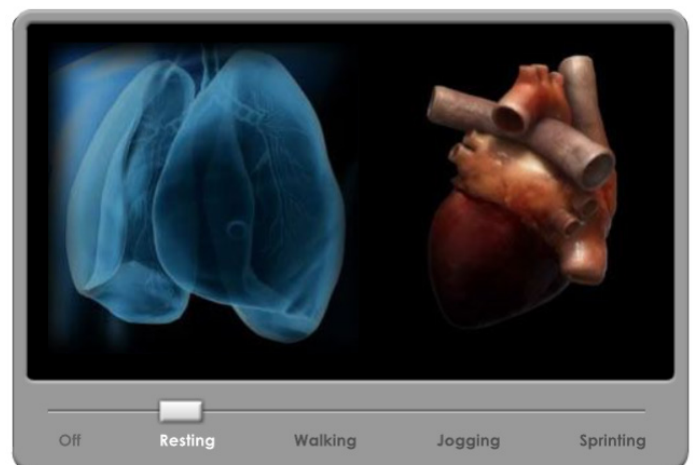

### 3D Interactive Packages with SCORM Tracking:

Immersive 3D learning environments for realistic simulations and hands-on practice.

**Simulation-Based Training:** Real-world scenario-based learning that enhances decision-making and problem-solving skills.

### K-12 Content with Animations, Interactive

**Exercises & Quizzes:** Age-appropriate educational content aligned with school curriculums with engaging assessments accessible on web and mobile platforms.

## Video Development

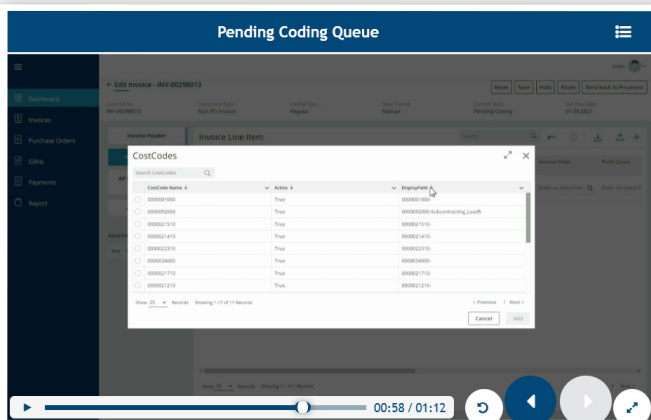

Visual storytelling is at the core of effective digital learning, and our video development services.
